Guidelines for Using this Map

The Generalized Policy Map and Future Land Use Map are intended to provide generalized guidance for development and conservation. They are intended to complement other Comprehensive Plan policies. Distinct important parameters, defined earlier, apply to their use and interpretation.

The Generalized Policy Map depicts and indicates land uses appropriate for development and conservation. The potential land uses are primarily based on land use characteristics and the environment, with consideration of other comprehensive policies and plans. The map is not intended to reflect specific policy decisions and are considered in concert with other Comprehensive Plan policies. Several important parameters, defined below, apply to these maps.

The Generalized Policy Map and Future Land Use Map are intended to provide generalized guidance for development and conservation. They are intended to complement other Comprehensive Plan policies. Distinct important parameters, defined earlier, apply to their use and interpretation.
